Results-driven Project Manager with 9+ years of experience in full-stack development, team leadership, and project management. Skilled in overseeing remote teams, managing project lifecycles, and delivering scalable, high-performance solutions using PHP, Node.js, Laravel, and React. Proven ability to streamline workflows, optimize resources, and drive successful project outcomes. Passionate about fostering collaboration, improving system architecture, and ensuring on-time, high-quality software delivery. Seeking a remote leadership role to drive innovation and deliver impactful technology solutions.

Skills & Competencies

Project & Team Management:
- Agile (Scrum, Kanban), Sprint Planning, Remote Team Leadership
- Jira, Asana, Trello, ClickUp, Resource & Time Tracking (Clockify, RescueTime)
- Team Collaboration (Slack, Skype, Zoom), Risk & Workflow Optimization

Technical Expertise & DevOps:
- System Architecture & Design (Monolithic, Microservices)
- Cloud Services (AWS, DigitalOcean, GCP, VPS), Kubernetes, Terraform
- DevOps & Deployment (Docker, Nginx, Apache, CI/CD: Jenkins, GitHub Actions, GitLab CI)

Software Development:
- Backend: PHP (Laravel, CodeIgniter), Node.js (Express, Fastify), Python (FastAPI, Flask)
- Frontend: JavaScript (React, jQuery), UI/UX (Figma, Tailwind, Bootstrap)
- Databases: MySQL, MongoDB, Redis, DynamoDB

Professional Experience

Senior Project Manager [Remote Job] Al Haramain [2.5 y] *Banani, Dhaka, BD* 09/2022 - Current
- Led a geographically distributed, cross-functional team of 36 developers, steering technical decisions and architectural strategies across PHP, Node.js, Python, JavaScript, React, and databases.
- Oversaw full-stack application development and deployment, driving a 10% performance boost through the integration of PHP, Node.js, React, and MySQL/NoSQL technologies.
- Directed the design, architecture, and ongoing maintenance of RESTful APIs and GraphQL endpoints, enhancing data retrieval efficiency and optimizing system performance.
- Spearheaded the design and implementation of 4 complex systems, reducing system downtime by 35% and improving scalability by 15%.
- Streamlined deployment processes by implementing CI/CD pipelines and Docker, reducing deployment time and mitigating post-deployment issues by 10%.

Project Manager [Remote J Al Haramain [1.8 y] *Banani, Dhaka, BD* 01/2021 - 08/2022
- Spearheaded cross-functional teams of 30+ professionals across diverse time zones, achieving a 95% on-time delivery rate and fostering a 20% enhancement in inter-team collaboration.
- Orchestrated the architecture and deployment of 12+ full-stack features leveraging PHP, Node.js, React, and MySQL, resulting in a 10% performance boost and a 15% reduction in page load times.
- Articulated strategic objectives, progress, and requirements to stakeholders, maintaining a 98% alignment and ensuring exceptional transparency throughout project lifecycles.
- Expertly utilized Microsoft Project, Jira, Trello, and Asana to facilitate seamless project tracking and execution, ensuring meticulous project oversight and delivery.

Project Manager [On-Site] Spondon IT [1 y] *Panthapath, Dhaka, BD* 07/2020 - 01/2021
- Defined project scope, objectives, and deliverables, aligning technical requirements with business goals through PHP, Node.js, Python, and complementary technologies.
- Strategically allocated and managed technical resources, proactively identifying and mitigating risks through MySQL, NoSQL, MongoDB, and RESTful APIs.
- Facilitated seamless collaboration between development and operations teams, bridging technical gaps by leveraging Git, CI/CD pipelines, and Docker for continuous integration.
- Executed infrastructure management as code, ensuring alignment and consistency across cPanel, WHM Panel, VPS, Apache, and Nginx configurations.

Senior Software Engineer [On-Site]   Spondon IT [1.6 y]   *Panthapath,Dhaka, BD*   01/2019 - 06/2020

- Directed development efforts using PHP (Laravel, CodeIgniter) alongside JavaScript, jQuery, and Ajax for both front-end and back-end functionality, ensuring cohesive system integration.
- Orchestrated the management and optimization of databases, including MySQL and NoSQL, ensuring high-performance data storage and rapid retrieval across platforms.
- Designed and implemented RESTful APIs and GraphQL endpoints to enable seamless, efficient communication between various application modules and external services.
- Fortified Apache web server configurations on cPanel, WHM Panel, and VPS, proactively mitigating over 15 potential DDoS attack vectors and significantly boosting system security.

Software Engineer [On-Site]   United Group [1.6 y]   *Gulshan-2, Dhaka, BD*   07/2017 - 12/2018

- Led end-to-end software development, from architecting scalable database schemas with MySQL and NoSQL to implementing robust server-side logic using PHP frameworks such as Laravel and CodeIgniter.
- Crafted responsive, visually captivating user interfaces with HTML, CSS, and Bootstrap, elevating the overall user experience and interface accessibility.
- Boosted web application interactivity and user engagement through JavaScript and jQuery, delivering a dynamic and seamless user experience.

Junior Software Engineer [On-Site]   United Group [1 y]   *Gulshan-2, Dhaka, BD*   06/2016 - 06/2017

- Engineered, tested, and maintained software applications utilizing PHP, JavaScript, and MySQL, ensuring high performance and reliability.
- Designed and optimized relational databases with SQL, enhancing data storage, retrieval efficiency, and overall system performance.
- Developed intuitive, user-centric interfaces and dynamic web applications using HTML, CSS, Bootstrap, and various front-end technologies to maximize usability.

Software Engineer, Intern   IWFM, BUET [6 months]   *Polashi, Dhaka, BD*   01/2016 - 06/2016

- Contributed to the design and development of intuitive web interfaces using HTML, CSS, Bootstrap, and JavaScript, enhancing overall user experience and accessibility.
- Collaborated with development teams to customize and extend WordPress themes and plugins, ensuring seamless integration with project requirements and client needs. Assisted in the design, implementation, and optimization of MySQL databases, ensuring efficient data management and robust support for web applications.

Education

Bachelor of Science   Stamford University Bangladesh   *Dhaka, BD*   04/2012 - 04/2016

- Major in Computer Science & Engineering
  - CGPA 3.73 [**Merit Scholarship**: Awarded for 3 trimesters]

Projects

- HRM - Human Resource Management System [Microservices, Node.js, Go, Python, Kafka, Hystrix, ELK, Redis, Docker - Ongoing]
- LMS - Learning Management System [Laravel, jQuery, Bootstrap, RestAPI]
- CRM - Client Relationship Management System [Laravel, jQuery, Bootstrap, RestAPI]
- Ecommerce - Online Marketplace with Multi Vendor [Next.js, Node.js, MongoDB, Laravel, MySQL]
- ExpenseTracker - Mobile Expense Tracking [Laravel, HTML, Tailwind CSS, Firebase, Flutter]
- Social Media Dashboard [React.js, GraphQL, Node.js, MongoDB]

Certifications

- Google Project Management Certificate – Completed (January 2025)
- Agile Project Management – Coursera (University of Maryland) – Completed (December 2024)
- Introduction to Project Management – Alison – Completed (November 2024)
- Scrum Master Fundamentals – Scrum Training Series – Completed (October 2024)
- Project Management Principles and Practices – Coursera (University of California, Irvine) – Completed (September 2024)

Others_____

- Agile Project Management Bootcamp – Coursera (May 2015)
- Remote Project Management Tools Bootcamp – Udemy (Aug 2016)
- Excellence in Project Management, Al Haramain (2022)
